Frama RMail automatically informs users of the need to treat certain emails with special care; and then transforms the message with specialized security in mind. This is true DLP in the desktop, no server settings or re-routings needed. For the sender, it ticks all the boxes for compliance and peace-of-mind.

Frama RMail is an 80/20 solution - works great out of the box, and can be configured around the needs of your business. Talk to Frama for industry or organisational specific adjustments of the Frama RMail Recommends engine.
